Curley & Haines GROUP

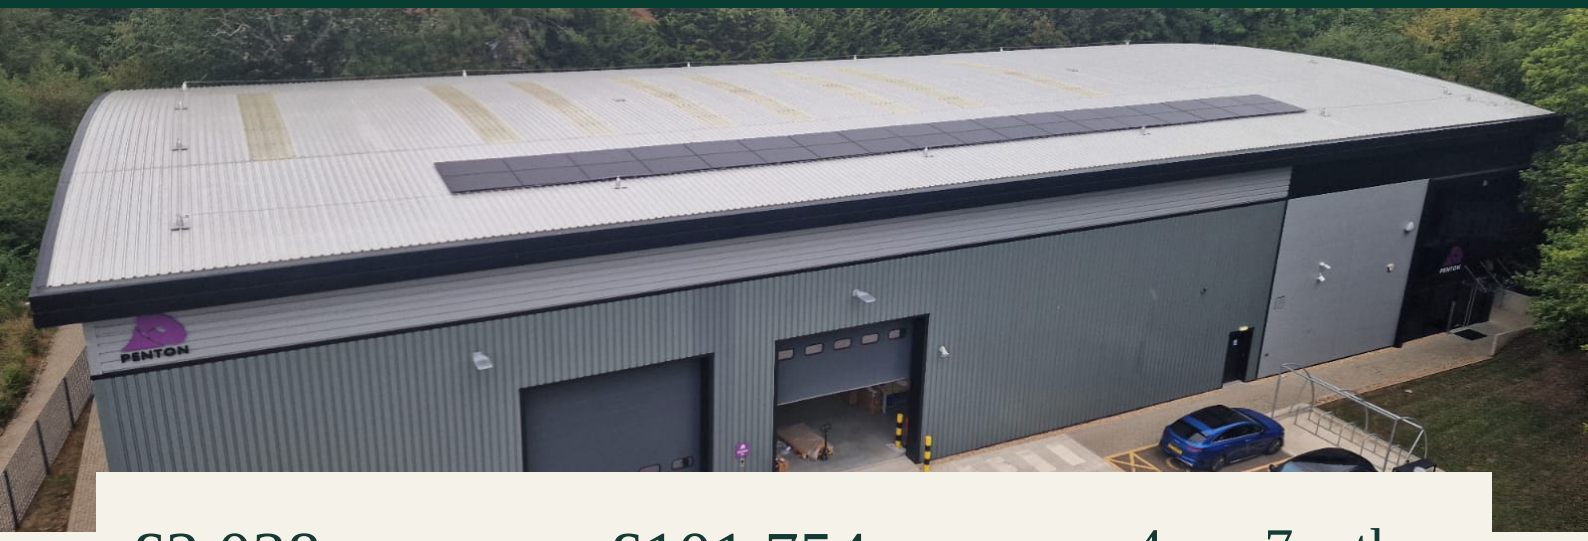

PROJECT CASE STUDY

Penton UK

ELECTRONICS MANUFACTURER

Confidence in the choice. Quality in the delivery.

Clear proposal comparisons. Two-day installation. Zero downtime.

£3,038	£101,754	4 yrs 7 mths
PROJECTED ANNUAL SAVINGS	25-YEAR NET SAVINGS*	PAYBACK

16.32 kWp	36 panels	2 days	0 days
SOLAR CAPACITY	INSTALLED	INSTALLATION	BUSINESS DOWNTIME

THE CH GROUP DIFFERENCE

Penton UK wanted confidence in its solar investment. CH Group brought the available proposals together and compared the options, making the decision easier and helping the business choose its installer with assurance.

FROM DECISION TO DELIVERY

Coops Renewables completed the 36-panel installation in just two days, with zero business downtime. Christina praised the excellent workmanship and singled out Connor Brown for his honesty, knowledge and conscientious approach throughout the project.

IN THE CLIENT'S WORDS

"The whole process was straightforward and well managed. Communication was good throughout, and we felt supported from the initial discussions right through to selecting the installer."

"Coops Renewables did an outstanding job, and the standard of workmanship was excellent."

Christina Turnbull
Operations Director, Penton UK

*Projected net savings over 25 years. Financial figures supplied for this case study.

Make solar a stronger business investment.
